

Summer 2005

Did You Know That?

ROBERT ROGERS, *Vice President/Director of Business Development*

1,000 physicians, nearly half of the private practice physicians in Hawaii, are using systems that need to be updated or upgraded, but are unable to do so without buying a costly new system from the same company or switching software. As a result we have had 100 new physicians join TeamPraxis in the last 12 months. I would like to welcome these new physicians and share with you some exciting new developments that you or your colleagues may not know about.

TeamPraxis is continually investing in our systems to make our clients practices run more efficiently. TeamPraxis is currently the **ONLY** practice management software vendor in the state to be offering electronic Tri-care claims, electronic secondary claims to Medicare and HMSA, electronic patient eligibility with HMSA through our schedulers, auto-claim status, EOB imaging, electronic lab results from both Clinical and Diagnostic Laboratories, Bi-directional EMR interfaces, and a 95% collection rate guarantee backed by \$10,000.

We are also continuing to invest in our infrastructure, and networking capacity to provide our clients with faster servers and more networking bandwidth. In addition to these investments, will be having a new version of ConnxtMD, Version 4.0.0, coming out next year. Some of you have seen it already and have given us extremely positive feedback. Our current investments in our infrastructure, bandwidth and version 4.0.0 will yield tremendous benefits for our clients currently using ConnxtMD. The improved performance and speed is reported to be as much as 50-100 times faster.

Chances are you know another physician or office that may not be with TeamPraxis. Their software vendor may asking them to upgrade, or buy new systems, or they don't have many of the services mentioned above. If this is the case, we want you to feel confident in referring them to us as your software vendor. If you or they have any questions please call me directly at 808 948-9359.
