

# Allscripts Clinical Quality Solution

## CQS Clinical Transformation Services

### Jump Start Your Quality Journey

Allscripts Clinical Quality Solution (CQS) Clinical Transformation Services provides basic to advanced level instruction and strategic goal setting to help bring people, processes and technology into alignment. With our virtual and onsite visits, our team ensures full leveraging of your investment in Allscripts CQS. We help our clients achieve maximum quality of care, efficiency and profit. Allscripts CQS Clinical Transformation Services training levels are described below.

### Level 1: Basic Functionality

Every critical function is covered, from preparing the Training Team and Key personnel on measure selection to post go-live tips. Included in Statement of Work for Allscripts CQS and PQRS, eRx and HCC channels.

- Allscripts CQS Train The Trainer (T3) - 3 hours
  - CMS/Physician Quality Reporting System/Measures, Allscripts CQS Training, Questions and Tips
- Additional Channels: HCC and eRx - 1 hour

### Level 2: Increased Utilization

Evolve processes to a new level of operational effectiveness by integrating the robust functionality that Allscripts CQS has to offer. Providing recommendations to the Training Team and Pilot/Showcase group increases provider engagement and improves scores. Additional charge. 3 hours.

- Registry Reporting/Result Analysis
- Provider Engagement/Workflow Refinement
- Meeting Measure Requirements

### Level 3: Meaningful Use

Understanding what is required and how Allscripts CQS will help to meet organizational goals. Included in Statement of Work for Meaningful Use. 4 hours.

- Meaningful Use Journey
- Meaningful Use Stage 1
- Allscripts CQS Train The Trainer (T3)
- Clinical Quality Measures Training

## Goals:

- Optimize use of the Allscripts CQS dashboard to improve outcomes
- Provide health policy expertise on CMS quality initiatives, Meaningful Use, stimulus and registry reporting
- Educate about measures development which allows groups to maximize reimbursements through bonus programs
- Focus on improvements and monitor success through each stage of the transformation process
- Provide testimonials of how fully utilizing Allscripts CQS and the dashboards offers valuable data at the Point of Care
- Have a consultant to close the gap as we move towards Population Health Management and Meaningful Use
- Fully understand processes/workflows and navigate through adoption challenges that often come with new technology
- Build a valuable clinician/quality team partnership
